Food for thought

If you've ever hosted a dinner party, this might resonate with you.

The arrangements were made about two months ago - two other couples are coming to your place and you haven't caught up for ages. So long in fact that you actually can't remember whose turn it really is to host.

They're coming over on Saturday night, so the panic starts around Thursday. A plan is made for the menu, carefully considering who has cooked what in the past and who has what allergies, likes and dislikes. Friday night sees some preparations made but the flurry begins early Saturday morning.

Shopping...cleaning...cooking...cleaning...

You've been looking forward to catching up for ages. And ages. But it's important to impress. Even though you've been great friends for ages and ages...it's important to impress. And to impress you continue to cook and clean and clean and cook right until...

Did we say 6.30pm or 7.00pm?

The doorbell rings. But there's stuff to do... The other two couples talk and reminisce and catch up. "It's been ages!" While you assemble and create and then contemplate.

Before you know it, it's late and promises are made not to leave it too long again...and you head to the sink with your head saying it's been a great night because everything went well. But your heart aches, just a little bit.

If this story resonates...just a little bit... then you'll fully appreciate this week's bible focus story about Mary and Martha in Luke 10:38

Many of us are like Martha. And there's nothing wrong with that. Jesus just encourages us to think about where our priorities lay.

Have a read of the story - it's food for thought.

The Primary Years Program

Natural Maths

Over the break our staff undertook some professional learning with Ann Baker from Natural Maths. This approach to maths is based on students developing depth of understanding with maths concepts, flexibility and fluency with thinking about maths and an ability to use a range of strategies to solve problems, important features of the Australian Curriculum's maths proficiencies. Classes around the school have been getting out of the classroom and engaging in hands-on, practical maths lessons.

Our Year 2 classes were finding arrays to look at multiplication.

Our Year 5 classes were exploring fractions in their kitchen lessons by making and dividing pizzas.

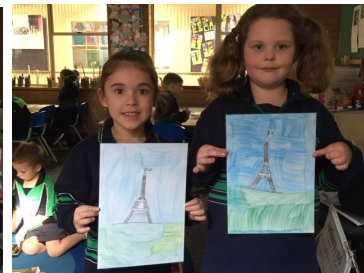

Units of inquiry

The PYP emphasises the value of student learning through inquiry. Teachers use provocations to help spark students' curiosity and get them asking questions.

Year 1 Central idea: People recognise important events through celebrations

Our Year 1 students have been looking at celebrations around the world. In Week 1 they had their own celebration as they looked at Bastille day and its importance to the people of France.

Year 4 Central idea: Colonial powers raced to monopolise resources

Our Year 4 students are beginning a unit on colonialism, looking at why countries set up colonies, the changes that took place through colonisation and the experiences of the people involved. They started their unit with a treasure hunt around the school, searching for some fairly everyday items which used to be precious (tea, coffee, spices, sugar, cotton).

CYBER SAFETY SESSION FOR PARENTS/CAREGIVERS

Immanuel will be hosting a:

ThinkUKnow Presentation on:
Monday the 26 August at 7.00pm
in the Taikondi

All parents, carers and teachers are encouraged to attend.

ThinkUKnow Australia is a cyber safety education program that educates parents, carers and teachers of how people are using technology, the challenges they may face online, and how to help them overcome these in a safe and ethical way.

ThinkUKnow Australia is a partnership between the Australian Federal Police, Microsoft Australia, Datacom and the Commonwealth Bank. The program is delivered in collaboration with policing partners New South Wales Police Force, Northern Territory Police, Queensland Police, South Australia Police, Tasmania Police, Western Australia Police, as well as Neighbourhood Watch Australasia.

The presentation will be delivered by a local law enforcement member and an industry volunteer. The presentation covers issues relating to children and young peoples' privacy and security online, their relationships with other users and their online reputation. It provides insight into the devices young people are using, as well as the popular websites, apps and social networking sites they're accessing.

This is a fantastic opportunity for you to learn more about young people and the online environment, and how you can help them to be safe and responsible users of technology.

Yr 4/5/6 students will be having a session during the afternoon of the same day.

For more information, you can visit www.thinkuknow.org.au or contact our school.
